## General Business Terms

### ADDRESS -

SPELL YOUR NAME AND ADDRESS IN PRINT FORM, so that there be no danger of mis-sending your order. Not doing so might cause delay and death to Plants or Fish. If possible (on Fish orders which go by express) give us your telephone number. It will help delivery.

### SHIPMENTS -

Fish shipments always go by Express and prices are f.o.b. Tampa, Fla. Small Plant, Snail and Fish Food orders may go forward via parcel-post if weather permits. Please include 15¢ for parcel-post charge on all Plant, Snail and Fish Food orders less than \$1.25.

### TERMS -

CASH WITH ALL ORDERS. If desired C. O. D., a deposit of 25% of the total amount of order must be sent in with order.

### SHIPPING CANS -

Our shipping department is endeavoring at all times to deliver to you live healthy specimens and use their best judgment, as to how many fish will ship safely in a can in the Summer, or in specially packed cans in the Winter.

1 GAL. AMERICAN CAN (Carry one to three pair of small size fish)	NOT RETURNABLE	\$ .15 EACH
LARGE SPECIALLY TREATED 5 GAL. AMERICAN CAN (Carry from 10 to 35 Medium size fish)	RETURNABLE FOR FULL CREDIT WITH CARTON (Without carton 75¢)	\$1.00 EACH
MEDIUM "EVERGLADES" SHIPPING CAN (Carry from 40 to 60 Medium size fish)	RETURNABLE FOR FULL CREDIT WITH CARTON (Without carton \$1.50)	\$1.75 EACH
LARGE "EVERGLADES" SHIPPING CAN (Carry from 60 to 80 Medium size fish)	RETURNABLE FOR FULL CREDIT WITH CARTON (Without carton \$1.75)	\$2.00 EACH
SPECIAL WAXED CARTONS FOR MALE SIAMESE FIGHTING FISH -	NOT RETURNABLE	\$ .05 EACH

CANS BEING RETURNED FOR CREDIT, MUST BE PREPAID. THIS COSTS YOU ONLY 20¢ AS A "returned empty can" BY EXPRESS.

REPLACEMENTS - We replace fish and plants only when claim is accompanied by a BAD ORDER SLIP received from the Railway Express Agent by you and sent to us direct by you. Please EXAMINE SHIPMENT ON ARRIVAL and should there be a loss, GET A BAD ORDER SLIP, stating whether can had been mishandled (dropped, overturned, overheated, chilled, or banged around to where the packing surrounding can is soaking wet and can showing a low water level). In this way you can help us in filing a claim.

WE THEN IN TURN WILL ALWAYS BE GLAD TO REPLACE IN CASE OF A LOSS.

## "TROPICAL FISH AND HOW TO HANDLE ON ARRIVAL"

All fish leave here in robust healthy condition, but on account of some trips being rather long, it is best to handle them carefully and properly when they arrive.

- 1 st. Leave your telephone number with the Express people, with instructions to be called immediately on arrival of shipment
- 2 nd. Meet the train and take shipment off yourself. This eliminates the danger of a shipment being dragged all over town before it is delivered to you. Such trucking is dangerous to shipments, in Summer or Winter.
- 3rd. In warm weather, be careful and note as to whether shipment had been overheated while enroute to you. This is noticeable especially as some specimens will look as if a white scum covers them. This scum is nothing but the protective slime which covers all fish, cooked off, and is caused by the allowing of a can to get overheated enroute.
- 4th. In cold weather, take thermometer with you and test water temperature at the express office. If same is below 70, the fish have been chilled and you should get a bad order report, stating the temperature.
- 5th. On arrival home have a good clean aquarium ready with seasoned water for the new arrivals. They should not be put with your other fish for at least two or three days. Strain the water from out of our cans and put as much of it as you can into your aquarium. Then, float our fish in jars into your aquarium, so that the temperature in jar equalizes with that in the aquarium. It is also best to add a little salt to your water, about three large tea-spoonfuls to every twenty (20) gallons of water. This will act as a tonic and will not bother your plants.

## PLANTS AND HOW TO HANDLE ON ARRIVAL

In planting up an aquarium for Tropical Fish, rooted plants are usually used. Tall plants are usually placed in the background, short plants in the foreground. Vallisnerias are usually used for background work, as well as some types of Sagittarias. There are many types of decorative plants listed here, most of which are used as center plants and the type used depends on the size of the aquarium.

Bunch plants usually come with a number of sprigs bunched with a piece of lead around the bottom. These should be pushed down into the sand and allowed to root, which they will do easily. Plants sold as cuttings will root the same as bunch plants if pushed down into the sand.

As planting an aquarium is one's own personal taste and viewpoint, we cannot recommend any special way.

## L I G H T

One of the greatest troubles the average Fancier has in plants spoiling on him and not growing, is lack of sunlight and overplanting. With a few exceptions, all Aquarium Plants require at least three to five hours of sun per day, or the equivalent of strong electric light over the aquarium. Plants kept without some direct sun usually deteriorate.

Sunlight is also good for your fish, as some varieties get the disease called "Rickets", because of the lack of sunlight. Such fish look caved in and seem to have hollow stomachs.

\*\*\*\*\*

THE RAREST AQUARIUM PLANTS

REAL "MADAGASCAR LACE PLANT" (North Madagascar)

APONOGETON (Ouvirandra) FENESTRALIS  
THE RAREST OF THE RARE AQUARIUM PLANTS

This plant is the most outstanding of Nature's handiwork. Its lacy leaves attract everyone's attention and cause wonderment at the peculiarity of this phenomenon growth. If handled properly, it is the most attractive thing in an aquarium. Its blossoms are in the shape of double headed white Shepherds crook. Undoubtedly it is "KING OF AQUARIUM PLANTS."

PER PLANT \$25.00  
\*\*\*\*\*

APONOGETON ULVACEUS (South Madagascar)

A real Queen of the aquarium, is this first cousin of the Madagascar Lace Plant. See write-up in the May 1939 "Aquarium Magazine" on page 12. Leaves are a Lettuce Green and from 2" to 4" in width. Blossoms, Golden-White and in the shape of a double headed Shepherds crook.

LARGE WELL PROPORTIONED MOTHER PLANTS \$5.00 EACH  
Young Well Developed Plants - - - - \$2.00 EACH  
\*\*\*\*\*

APONOGETON CRISPUS (From Ceylon)

A NEW Ceylon importation, also belonging to the Lace Plant Family. Almost as transparent as the Ulvaceus, but narrower leaved. These are undulated and a beautiful Lettuce Green. Blossoms White and in the shape of a Shepherds Crook. We name this "PRINCE OF AQUARIUM PLANTS."

LARGE LONG LEAVED PLANTS \$2.00 EACH - NICE BUSHY 6" PLANTS 55¢ EACH  
\*\*\*\*\*

THE RARER AQUARIUM PLANTS CONT'D.

APONOGETON ELONGATUS (Australia)

This Queensland variety also belongs to the Lace Plant Family and grows leaves in color from translucent green to bronze red. Blooms easily under aquarium conditions and blossoms are a Golden-Rod color, shaped like a Shepherds Crook. The "PRINCESS OF AQUARIUM PLANTS."

EXTRA NICE DEVELOPED PLANTS \$1.50 EACH

\*\*\*\*\*

"AMAZON SWORD PLANT"

(Echinodorus Specie)

This introduction from the Amazon grows very well under aquarium conditions, propagating from the larger plants in shoots that float to the top of the water. See magazine write-up of February 1938 issue of "The Aquarium." This plant undoubtedly is the natural leaf on which Angel Fish lay their spawn in their native haunts.

YOUNG WELL DEVELOPED PLANTS 25¢ EACH - MEDIUM SPECIMENS 45¢ EACH

EX. LARGE MOTHER PLANTS MANY LEAVED \$1.00 EACH

\*\*\*\*\*

GIANT "WIDE LEAF AMAZON SWORD PLANT"

(Echinodorus Specie var. major)

The Newest edition in a larger and wider leaf variety of the Amazon Sword Plant. When full grown they are from 3½" to 5" in width, 12" to 18" in height. At present we offer young plants only about 8" in height. VERY RARE. Propagates same as the narrow leaf Amazon Sword Plant.

PER PLANT \$1.25
